Comp No.: 24873

To,

- i. Nodal Officer, State EMRS Societies, EMRS projects;
 - ii. Executive Engineer, CPWD, EMRS projects;
 - iii. Zonal Manager, PSUs, EMRS projects;
- (As per standard list)

Subject: Restriction for use of infrastructure provided in Phase-I construction by contractor of Phase-II construction-reg.

Sir,

Kind attention is invited towards the subject cited above.

It has been reported that internal roads and other infrastructure such as Borewell/s provided in Phase-1 construction are being utilized by Phase-2 contractors for transportation of materials & machinery during construction. Such activities may damage internal roads constructed in Phase-1 since they have not been designed for heavy vehicular traffic movement and the Borewells are also not meant for construction purpose.

In view of above, following directions are being issued to Construction Agencies so as to avoid usage of infrastructure of Phase-1 EMRS works: -

- i. Phase-2 contractor shall make his own arrangement for execution of work without using and damaging any part of infrastructure either already constructed or under construction in Phase-1.
- ii. Phase-2 contractor shall make a separate entry by constructing a temporary gate or alternatively by diverting the road in consultation with PSU Engineers for transportation of building materials. If new temporary gate is made the contractor shall make good the portion of the compound wall in original shape at his own cost after completion of Phase-2 work.
- iii. Phase-2 contractor shall also barricade the construction site with pre-coated GI sheet structure etc to keep Phase-I work free from all the disturbance at its own cost.

11/11/24

iv. Construction Agency shall make all out efforts to ensure that no disturbance is caused in smooth running/functioning of the school.

This issues with the approval of Competent Authority.

Yours faithfully,

(R.P. Joshi)

Executive Engineer
