Dated: 08/08/2025

**The Nodal Officers,**

State/UTs EMRS Societies,

(As per list)

**Subject:** Developing Language ability of Students in EMRSs.

Dear Sir/Madam,

With reference to the objectives of EMRSs to promote the holistic development of students, it has been decided to implement a structured initiative aimed at enhancing students' proficiency in English and Hindi, which are the principal mediums of instruction beyond Class VII/VIII. In order to ensure a smooth and effective transition to Hindi and English as mediums of instruction from Class VIII onwards, the following strategy is proposed:

1. Two days per week shall be designated for communication skill development—one day each for English and Hindi. On these days, all classroom instruction, co-curricular activities, and general communication shall be conducted exclusively in the respective language to foster immersion and build confidence.

Further, the teachers will monitor, guide, and document any common language errors during these days, which will be addressed by the respective language teachers. Additionally, lists of commonly used words and sentences in both languages may be displayed in classrooms, hostels, and dining areas to encourage continuous learning. This initiative is expected to yield significant improvement in students' communication skills within 1–2 years, thereby supporting their academic success and future readiness.

In this regard, it is requested to kindly disseminate these instruction to the EMRSs under your jurisdiction.

This issues with the approval of the Competent Authority.

-sd-
